

Tetsuya Ido received the Doctor degree of technology in applied physics from the University of Tokyo, Tokyo, Japan, in 1998. From 1998 to 2002, he was a Post-Doctoral Fellow with Japan Science and Technology Agency, Kawaguchi, Japan, where he was involved in laser cooling and precision spectroscopy of neutral strontium atoms. From 2002 to 2006, he was with JILA, Boulder, CO, USA, where he was involved in continued research on precision spectroscopy of neutral strontium. Since 2006, he has been with National Institute of Information and Communications Technology, Tokyo, Japan. After building a strontium lattice clock and contributing to the achievement of various advanced frequency links using an optical fiber or satellites, he is currently the director of Space-Time Standards Laboratory, in NICT.
