

**Mamoru Ishii** received his B.S, M.S., and Ph.D. degrees in Geophysics from Kyoto University, Kyoto, Japan in 1988, 1990 and 1993, respectively. After studying in Max-Planck Institute of Aeronomie, Germany temporally in 1993 to 1994, he joined Communications Research Laboratory (CRL, now National Institute of Information and Communications Technology (NICT)), Japan in 1994. Dr. Ishii is currently the director of Space Environment Laboratory, NICT. His major research interests include the system development of operational space weather forecast services, especially improvement of the precision. He contributes to the activity of Study Group 3 in International Telecommunication Union (ITU-R/SG3) as a delegate of Japan since 2008. He is the task team science leader of the Inter-Programme Team on Space Weather Information, Systems and Services, World Meteorology Organization (WMO/IPT-SWeISS) since 2015, and an expert member of the Committee on the Peaceful Uses of Outer Space, United Nation (UN/COPUOS) since 2013, and of the Meteorology Panel, and of Science and Technology Sub-committee, International Civil Aviation Organization (ICAO/MISD) since 2015. He is the deputy director of the International Space Environment Services (ISES) since 2019,
